SUMMARY

Senior Frontend Developer with 7+ years of experience specializing in JavaScript, TypeScript, React.js, and Next.js. Currently building RideNgo, a bike rental platform, end to end — from MVP to public launch — including payment integrations, real-time error monitoring, and data-driven dashboards. Previously led frontend teams and built SDKs and no-code SaaS platforms at Conscent.ai. Known for startup-level ownership and product thinking.

SKILLS

Languages & Markup: JavaScript, TypeScript, HTML5, CSS3, SASS

Frameworks & Libraries: React.js, Next.js, Preact, Redux, NestJS, Framer Motion

Styling: Tailwind CSS, Bootstrap, Material UI

Performance: Caching strategies, lazy loading, code splitting, SEO optimization

Tools & Testing: Jest, Webpack, Sentry, Git

WORK EXPERIENCE

RideNgo (ridengo.in)

Senior Frontend Developer | Jun 2024 – Present | Bangalore, India

- Built the entire frontend of a bike rental platform from scratch using Next.js and React, taking the product from MVP to public launch.
- Integrated secure payment gateways enabling seamless bookings and rental transactions.
- Set up Sentry for real-time error monitoring, proactively resolving production issues and improving platform stability.
- Built interactive admin and partner dashboards for managing bookings, tracking activity, and generating business insights.
- Implemented SEO and performance optimizations (lazy loading, code splitting), significantly improving page speed and organic visibility.

Conscent.ai

SDE II | Nov 2020 – Jun 2024 | Delhi, India

- Led a team of 2 developers and 2 interns delivering frontend products and SDKs.
- Built a JavaScript SDK (React, Next.js) to assess user capacity for subscriptions or micro-payments and predict payment likelihood from consumption patterns.
- Developed a no-code SaaS platform for Identity Management Systems featuring a customizable JavaScript SDK with a user-friendly dashboard (Preact, React, NestJS).
- Created a SaaS subscription-model system enabling seamless payment and subscription management across platforms.
- Designed and implemented a payment gateway routing system supporting Razorpay and Paytm, enabling clients to start collecting payments immediately.

Pixean | OKSBIRD Online Services Pvt. Ltd.

Frontend Engineer | Nov 2018 – Oct 2020 | Mumbai, India

- Built a cloud storage platform for photographers, artists, and designers, enabling seamless photo uploads for customer deliveries and gallery showcases.
- Developed photo-sharing integrations for WhatsApp, Facebook, Twitter, and Gmail.
- Implemented a portfolio feature leveraging uploaded pictures to enhance users' market presence.
